Hi everyone. Here is a message and invitation from the King County Wastewater Treatment Division: Join neighbors, park users, local artists and King County staff for a paint party in Lowman Beach Park! **King County Murray CSO Control Facility Fence Art Paint Party** **August 18, 2012 at 10 a.m. – 3:30 p.m.**
Lowman Beach Park, 7071 Beach Drive Southwest

Construction of King County's Combined Sewer Overflow (CSO) Control Facility begins in 2013, but site preparation gets underway soon. To get ready, King County is erecting a fence prior to the deconstruction of the onsite buildings this fall.

You are invited to help paint the mural that will cover the Murray Combined Sewer Overflow (CSO) Control Facility construction site fence for at least the next year. The Nature Consortium's teaching artist will be onsite to explain mural design and help painters get started. Materials and templates will be provided,
but wear your painting clothes
!

Families and children of all ages are welcome, and there is no obligation to stay for the whole day. You can paint for a while, enjoy a snack and then go enjoy the rest of your Saturday.

We hope to see you there!

King County is building the Murray CSO Control Facility to protect public health and clean up Puget Sound.

Please contact me at this email or via phone:
206-684-1235
for more information.

Thanks,

Doug
