

INTERIOR TRAIL CIRCULATION
ORCHARD ST. RAVINE DATE: NOV. 1, 2005

This option represents an interior site trail for maintenance and interpretation / appreciation of native plants and wildlife. This is illustrated by a series of looping trails on the flattest areas of the southwest and southeast portions of the site. The trail would be 4 feet wide with a compacted crushed gravel surface and, as measured off the rough sketch, approximately 620 feet on the west loop and 340 feet on the east loop.

Trail construction & associated restoration - \$24,000-\$29,000
 Remaining for VMP and Implementation - \$146,000 - \$151,000
